DRAPe

Welcome!

What is DRAPE?

enel

A unique and global tool that allows the management of the billing process and the follow-up of payments.

Provides timely and online information on the status of transactions. A further step towards digital transformation.

Integrated with different systems to achieve efficiency in the process.

It has automatic validations that allow optimal product quality.

Has services for warranty and legal compliance required by tax regulations, supported by a supplier with certified technology.

Designed to provide quality service and strengthen the relationship with our partner companies.

How does DRAPE help the supplier?

enel

Intuitive and easy to use tool.

Allows automatic billing for suppliers with digital signatures. Allows manual invoicing, pdf invoice loading for suppliers without digital signature.

It offers at a glance the summary of billable orders of existing Enel companies and the availability of "compliance" on the platform.

Summary of the invoice status, from its creation, draft, signature, sending, rejection, sending and payment.

Best practices in digital and IT security processes.

Efficient and agile interaction with all areas involved in the process.

The logo for DRAPC features the letters 'D', 'R', 'A', and 'P' in a blue serif font, followed by a 'C' in an orange sans-serif font. A horizontal grey bar is positioned across the middle of the 'C'. The entire text is centered within a white oval that has a green border. The background is a dark blue digital-themed collage with a wireframe globe, a hexagonal grid of icons (including a target, currency symbols, a person, a lightbulb, a laptop, a cloud download arrow, and an hourglass), and various data visualization elements like a line graph and a bar chart.
