

Safety is done together.

We generate awareness: we can all actively participate in building a safe work environment and that is why we want to spread a positive message and make the materials of the communication campaign completely available to you with the aim of sharing them internally.

PHASE 1 TOOLKIT GUIDELINES (May 25 - June 19)

Here you will find a **toolkit** composed of customizable materials specifically for you:

- **a poster** to be displayed in your offices.
- **an email header** to be used for sending emails with safety messages specifically for your colleagues (nothing prevents you from using it also in your docs, for example as a Word footer, or as preferred)
- **a digital booklet** with the 6 keywords and their definitions of the Enel Group available to consult and disseminate internally.
- **a postcard** that you can fill out yourself with an ad hoc message specifically for your colleagues or suppliers.
- **a poignant video** that metaphorically retraces the first 6 keywords that refer to safety.

For any clarification, you can contact the Enel colleague, who is listed in the campaign launch email you received.

PHASE 2 TOOLKIT GUIDELINES – available starting June 20.

Visit the platform and don't miss the updates.
